Create form using text box, check box, radio button, select, submit button. And display user inserted value in new PHP page (e.g. student registration/inventory/library form).

Code: registration.html

```
<html>
      <head>
      <title>registration from</title>
      </head>

      <body>
      <form method="get" action="form2.php">
            <table align="center" height="100%" width="100%" border="2">
            <tr height="20%">
<td colspan="3"><center><h1><b>Registration form</b></h1></center></td>
            </tr>
            <tr height="60%">
                  <td width="20%"> </td>
                  <td width="60%">
                        <table align="center" height="100%">
                              <th>name:</th>
                              <td>
                                    <input type="text" name="txt_name">
                              </td>
                        </tr>

                        <tr>
                              <th>User name:</th>
                              <td>
                                    <input type="text" name="txt_uname">
